

Check Management

Complete handling of incoming and outgoing checks: post-dated checks, deposits, collection, bounces, endorsement, bank discounting, guarantee checks, custody, checkbooks and approvals, with accounting entries created automatically.

Module: **sa_check_management** · Version **18.0.1.14.0** · Author: **Sayed Anwar** · October 2026

15 Appendix: check states

This guide uses Odoo 18 in English; button and menu names appear exactly as on screen. Buttons look like **Receive** and menus like **Check Management → Operations → Incoming Checks**.

1. The suite at a glance

The suite has three modules. The core module, **Check Management**, holds the whole check lifecycle and the accounting; the other two are optional add-ons:

- **Check Printing:** prints outgoing checks straight onto the bank leaf, with the amount in words in Arabic or English.
- **Check Sales:** warns about or blocks sales to customers with bounced checks, and counts uncollected checks in the credit limit. It installs itself when Sales is installed.

The modules and how they depend on each other

The core idea

Every check has a **state** (Draft, Received, Under Collection...). The state never changes by editing; it changes only through the buttons at the top of the check. Each button:

- checks that the user has the right role and that the move is allowed from the current state;
- posts the matching accounting entry and reconciles it;
- writes the event to the **check history**, which cannot be edited or deleted.

Once a check leaves Draft, its identity fields (number, amount, partner, currency, dates, bank) lock. To fix a mistake, use **Reset to Draft** or **Cancel**, depending on your role.

2. Roles and permissions

Open **Settings → Users & Companies → Users**, pick the user and set their role in the **Check Management** section.

Who can do what
Each role includes the one under it. Finance Approver, Accountant and Auditor sit beside the main ladder.

Check Manager
Cancel after Draft · reset · withdraw from bank · release / invoke guarantees · reprint · configuration · approve sensitive requests

Treasury Officer
Deposit · collect · bounce · endorse · discount · handovers · checkbooks · print checks · legal action

Check User
Create checks · add invoices / bills · receive · issue · submit for approval

Finance Approver
Approves outgoing checks at their approval stage

Check Accountant
Reviews accounting changes · clears the review flag

Check Auditor
Read-only: checks, history, reports

Each role includes the one below it

Role	Typical person	Can do
Check User	Accountant, sales admin	Create checks, add invoices/bills, receive, issue, submit for approval
Treasury Officer	Treasurer, cashier	All of the above + deposit, collect, bounce, endorse, discount, handovers, checkbooks, print checks, legal action
Check Manager	Finance manager	All of the above + cancel after Draft, reset to Draft, withdraw from bank, release/invoke guarantees, reprint, configuration
Finance Approver	Approver	Approve outgoing checks at their approval stage
Check Accountant	Chief accountant	Review accounting changes and clear the "Needs Accounting Review" flag
Check Auditor	Internal audit	Read-only access to checks, history and reports

Segregation of duties: when enabled, whoever created or submitted an outgoing check cannot approve it, and the same person cannot approve two stages of one check.

3. First-time setup

3.1 Install

Install **Check Management** from **Apps**. The company needs a chart of accounts. On install (and on the first posting if anything is missing) the module creates the **Checks Receivable (PDC)** and **Checks Payable (PDC)** accounts, a **Checks Portfolio** journal and the "Check" payment methods. You can point the settings at your own accounts instead.

3.2 Settings

Check Management → Configuration → Settings. The defaults work; these are the choices worth reviewing:

Setting	What it decides
Invoice Settlement	At receipt / issue (default): the check settles the invoice when received and sits on the PDC account until the bank collects it. At collection / clearing : the invoice stays open until the bank collects or clears the check.
Check Accounts, Checks Portfolio	Holding accounts and journal for checks in hand and checks issued.
Checks Under Collection	An extra entry on deposit that moves the check to a "checks under collection" account.
Bounce Fees	Bank fees on a bounce are a company expense or charged to the customer.
Check Discounting	Enable discounting post-dated checks at banks, with the liability and charges accounts.
Re-deposit Limit	Re-deposits allowed before a Check Manager must do it.
Handover Confirmation / Default Location	The receiver must accept custody handovers; where new checks are held.
Approval Required / Segregation of Duties / Check Validity	Outgoing checks need approval before issue; no approving your own check; months after which an uncleared check is stale.
Foreign Currency Valuation / Manual Valuation Rate	The rate date used to value foreign-currency checks in reports. Entries always use the rate of their own date.
Maturity Horizons / reminders / Escalation	Day ranges for "due soon / short / medium term", reminder timing, and after how many days items escalate to Check Managers.

Guarantee Memorandum

Record guarantee checks on off-balance accounts while they are held.

Settings: Banking, Custody and Reminders

3.3 Master data

All under **Check Management → Configuration**, with the Check Manager role:

- **Bounce Reasons:** pre-loaded (insufficient funds, signature mismatch, account closed, payment stopped...); add your bank's codes.
- **Custody Locations:** safes, branches and people that hold checks, each with a responsible user.
- **Approval Stages:** approval steps for outgoing checks by amount and purpose, each with an approver group. Without stages, a single "Finance Approval" by the Finance Approver group applies.
- **Sensitive Action Rules:** actions such as cancelling after Draft, Lost or Release Guarantee that only run after approval by a group you choose.
- **Bank Discount Terms:** per bank, the advance percentage, annual interest and fixed fee per check.

Stage	Direction	Purpose	From Amount	Up To Amount	Approvers	Active
Accounts Review	Outgoing		0.00 LE	0.00 LE	Check Management / Finance Approver	Active
CFO Approval	Outgoing		100,000.00 LE	0.00 LE	Check Management / Check Manager	Active

Approval stages by amount

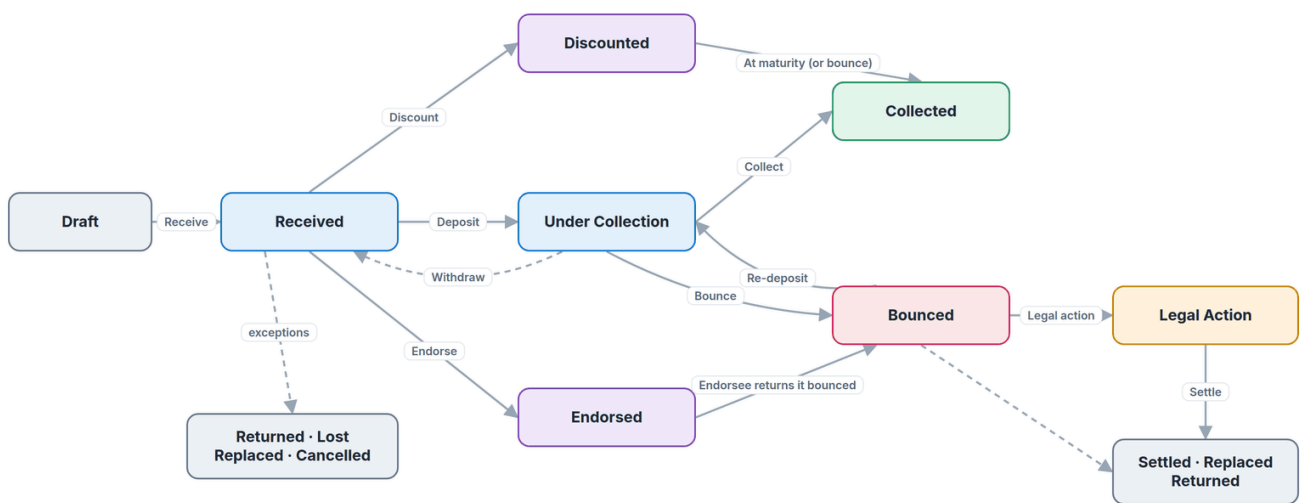

Bank	Advance (%)	Annual Inter...	Fixed Fee per ...	Active
NBE - Current Account	90.00	24.00	150.00 LE	Active

Discount terms per bank

4. Incoming checks step by step

Incoming check lifecycle

Every move is a button on the check; each one is logged in the check history.

Incoming check lifecycle

- Create the check:** **Operations** → **Incoming Checks** → **New**. Enter the check number, customer, amount, issue and due dates, the drawer's bank and the **Drawer Account Number** (used to detect duplicates). For a third-party check, untick **Drawn by Partner** and type the drawer's name.
- Add the invoices:** in the **Allocations** tab click **Add Invoices**, tick the invoices the check pays and adjust the amounts. The amount is spread over installments, earliest due first; any remainder is an advance.
- Receive:** click **Receive**. The entry is posted, the invoices are settled (default policy) and the check goes to the default custody location.
- Deposit:** select one or more checks in the list and click **Deposit**, then choose the bank and slip number. A **deposit** is created that you can print and hand to the bank.
- Bank result:** on the deposit (or the check) click **Collect** or **Bounce**. A bounce asks for the reason, the bank reference, any bank fee and the bank's notice as evidence. The customer balance reopens automatically.
- After a bounce:** **Re-deposit**, **Legal Action** (case number, lawyer, court), **Replace** with a new check (open allocations move to it), **Settled Otherwise** or **Return to Partner**.

6. Outgoing checks step by step

Outgoing check lifecycle

Approval stages are optional; segregation of duties applies when enabled.

□ Start □ Special handling □ In progress □ Closed OK □ Problem

Outgoing check lifecycle

- 1 Create:** **Operations → Outgoing Checks → New**. Vendor, amount, due date, **Bank Journal** and **Checkbook Leaf** (the check number fills in from the leaf).
- 2 Add the bills:** in the Allocations tab, **Add Bills**.
- 3 Approval:** click **Submit for Approval**. The stages matching the amount and purpose are created, and each approver clicks **Approve** or **Reject** with a reason, in order.
- 4 Print and issue:** **Print Check** (with the Printing add-on), then **Issue**: the vendor bill is settled and the leaf is marked used.
- 5 Deliver and clear:** **Deliver** (who received it), optionally **Mark Presented**, then **Mark Cleared** when the bank pays it. Matching the bank statement line with the entry closes it automatically.
- 6 Exceptions:** **Stop Payment**, **Rejected by Bank** (then **Replace** or **Settled Otherwise**), **Lost**, and **Void Stale Check** once it passes its validity period.

A check delivered to the beneficiary, waiting for the bank

7. Custody and handovers

The system always knows where the paper check is and who holds it (the **Held At** field). To move checks from one holder to another:

- 1 **Operations → Handovers → New:** from, to, and the checks.
- 2 Click **Hand Over** . With "Handover Confirmation" on, the checks move only when the receiver clicks **Accept** (or **Refuse** with a reason).
- 3 Print the **Handover Receipt** for signature.

Depositing moves the check to the bank's custody automatically; collection, return or endorsement takes it out of custody.

8. Checkbooks

- 1 **Operations → Checkbooks → New:** the bank, first and last number and digits (or **Import Leaves** for a list of numbers).
- 2 Click **Start Using** : the leaves are generated and every outgoing check on that bank must pick a leaf.
- 3 A leaf becomes Reserved when a draft check picks it, Used once issued, and Void if the check is cancelled after issue. Cancelled before issue, it becomes available again.
- 4 A Check Manager marks damaged or lost leaves; **Close Checkbook** voids the unused leaves.

The screenshot displays the 'Check Management' interface for 'Nile Trading Co.'. The 'Checkbooks' section is active, showing a 'New' checkbook 'CB/2026/001'. The configuration includes 'Bank: CIB - Current Account', 'Require Checkbook Leaves: [checked]', 'Leaves From: Number Range', 'First Number: 100,001', 'Last Number: 100,050', 'Padding: 8', and 'Available Count: 45'. A table below lists 14 leaves with their states and actions.

Number	State	Check	Actions
00100001	Reserved	CHK/OUT/2026/00001 (00100001)

9. Approval requests for sensitive actions

When a rule covers an action (for example cancelling after Draft), a Treasury Officer running it creates an **approval request** instead of executing it, and the approvers get a to-do.

- 1 The approver opens **Operations → Approval Requests**.
- 2 They click **Approve and Run** and the action executes, or **Reject** with a reason.
- 3 The requester can **Withdraw Request** before the decision. Nobody can approve their own request.

10. Accounting

You never post a check entry by hand: each button posts the entry and reconciles it. A reversal keeps the original entry and adds a reversing one, so the audit trail stays clear.

What the module posts in Accounting

Settlement at receipt / issue (default). All entries are created and reconciled automatically.

1

Receive incoming check

Dr

Checks Receivable (PDC)

Cr

Customer receivable — invoice reconciled

2

Deposit at bank (optional entry)

Cr

Checks Under Collection (reversal)

+ bank fee: expense or charged to customer

5

Issue outgoing check

Dr

Vendor payable — bill reconciled

Cr

Checks Payable (PDC)

6

Bank clears it

Dr

Checks Payable (PDC)

Cr

Bank / outstanding payments

7

Discount at bank

Dr

Bank (net advance) + discount charges

Cr

Discounted Checks Liability

8

Guarantee checks

No balance-sheet entry. Optional off-balance memorandum entry while held.

The entries posted at each step

Bank statement matching

When a bank statement line is matched with the check's open entry, the incoming check becomes **Collected** and the outgoing one **Cleared** automatically.

The "Needs Accounting Review" flag

If someone in Accounting resets a check entry to draft, cancels it or unreconciles it from the invoice, the check is flagged **Needs Accounting Review** and its responsible gets a to-do. Use **Repair Allocations** to re-match it, then **Mark Accounting Reviewed**.

12. Reminders and escalation

A daily job creates to-do activities for the people concerned, never twice for the same item:

Reminder	Goes to
A check due within the "Due Checks" days	The check's responsible
An incoming check past due and not deposited	The check's responsible
An outgoing check past due and not cleared	The check's responsible
A bounced check to follow up	The check's responsible
A guarantee about to expire or expired	The check's responsible
An overdue approval	The stage's approvers
A deposit without results	Whoever created the deposit
A handover not accepted	The receiver

If an item is still open after the **Escalation** days from its first reminder, it goes to the Check Managers.

13. Importing legacy checks

- 1 Configuration → Import Legacy Checks → Download Template .
- 2 Fill one row per check with the columns: direction, check_number, partner, amount, currency, issue_date, due_date, bank, drawer_name, drawer_account, purpose, state, journal, deposit_date, reference .
- 3 Allowed states: incoming received , under_collection (with the bank journal and deposit date) or bounced ; outgoing issued or delivered .
- 4 Check File to see the errors before importing, then Import .

Untick **Post Opening Check Entries** if your opening balances already contain these checks, so they are not recorded twice.

Import Legacy Checks

Each row becomes a check in its current state with one "Imported" history event. Incoming checks can be received, under_collection (with the deposit bank journal) or bounced; outgoing checks can be issued or delivered.

14. FAQ and error messages

Message / situation	Cause and fix
Check number already exists in the same scope	The same number exists for the same bank and drawer account (or the same bank journal for outgoing), even if typed with spaces or zeros. If the check is genuine, a Check Manager ticks Duplicate Number Approved .
These fields cannot be changed after the check leaves Draft	Identity fields are locked. Use Reset to Draft (Manager) if there are no entries, or cancel and create a new check.
The check state can only change through its lifecycle actions	Change the state with the buttons, not by editing.
Another user is processing one of these checks right now	Someone pressed a button on the same check at the same moment. Wait a second and try again.
Reached the maximum of re-deposits	Only a Check Manager can re-deposit past the limit.
You cannot approve a check you created or submitted	Segregation of duties is on; another approver is needed.
This action needs approval	A sensitive action rule covers it; run it from the dialog to create a request.
The bank requires a checkbook leaf	The bank has an active checkbook; pick a Checkbook Leaf before Issue .
Check currency differs from the bank's	Deposits and issues must be in the bank account's currency.

15. Appendix: check states

State	Direction	Meaning
Draft	Both	Being prepared; editable and invoices can be added.
Received	Incoming	In our custody.
Under Collection	Incoming	Deposited, waiting for the bank.
Collected	Incoming	The bank collected the money.
Bounced	Incoming	Returned by the bank; the customer owes again.
Legal Action	Incoming	A case is filed over the bounced check.
Endorsed	Incoming	Endorsed to a vendor.
Discounted	Incoming	The bank advanced its value until maturity.
Pending Approval / Approved	Outgoing	In approval / ready to print and issue.
Issued / Delivered / Presented	Outgoing	Written / handed to the beneficiary / presented to the bank.
Cleared	Outgoing	Paid by the bank.
Rejected / Stopped	Outgoing	Rejected by the bank / payment stopped.
Settled / Replaced / Returned / Lost / Cancelled	Both	Closed: settled another way / replaced by a new check / returned / lost / cancelled.
